

Eco-Friendly Series

Eco-Friendly PET Band

A strapping band made from recycled materials such as PET bottles, offering the same quality as conventional products. Supports labor-saving operations for users.

[Applications]

Pallet packaging / Paperboard packaging / Bulk packaging / Ingot packaging / Construction material packaging / Refractory brick packaging / Export packaging / Reinforced cardboard packaging / Volume-reduction packaging (recycled PET bottles, etc.) / Recycled product packaging (home appliances, automotive parts, etc.)

Features of Eco-Friendly PET Band

- An environmentally friendly strapping band designed for zero-emission initiatives.
- Ideal for users addressing environmental issues.
- Offers superior tension retention compared with PP bands.
- Excellent heat resistance with minimal impact from temperature changes.
- Can be used with existing strapping machines without adjustment.
- Does not generate harmful gases when incinerated.
